

Features:

- New high quality design and metallic colored front cover
- Call button surrounded by luminous ring for use in dark places

(in darkness)

Luminous ring*¹

*¹ If the ring is not exposed to light, it will not emit light.

- Suitable for SOHO and office use
- Mounts directly onto walls

The KX-T7765 is a new high quality design doorphone.

It is suitable for SOHO and office use and makes a nice match with any door.

The KX-T7765 connects directly to Panasonic's PBX and allows owners to easily speak with visitors.

And, visitors can easily find the call button thanks to the luminous ring, so you will never miss a good business opportunity.

KX-T7765 Specifications

Luminous Ring Specifications

- Once exposed to light (from fluorescent lamp or incandescent lamp) for about 30 min, this ring keeps emitting light for about 1 to 1.5 hours in the darkness at normal temperatures.
Max. residual lighting time: About 1.5 hours
- If exposed to any light, the ring emits light repeatedly.

Notes:

- The duration of light emission varies according to light accumulation, place of installation and so forth.
- If the ring is not exposed to light, it will not emit light.
